Build your Big Data analytics through the complete set of capabilities provided by SpagoBI suite.

Extract knowledge and value from large volumes of heterogeneous data, and effectively support your decision-making processes and business strategies.

Access a wide range of **data sources:**
- traditional databases and appliances (Teradata, VectorWise, Netezza)
- NoSQL databases (Cassandra, OrientDB, MongoDB, VoltDB, CouchDB, Neo4J)
- Hadoop (Hive, HBase, Impala, Greenplum, SparkSQL)

Manage and explore your data through **complete insights:**
- self-service reports and dashboards
- network analysis
- data mining
- predictive analytics

100% open source, complete, enterprise-level product
- integrating cutting-edge technologies and innovation
- Cloudera certified
- complete support and services
